

## 船舶用 倾斜表 德国原装

船舶航运的必需品---船舶用倾斜表、其结实耐用性、耐震性、防腐蚀性、防海蚀性、免维护等等特殊性能上的要求非常高，一般仪表是不能胜任的。综合上述因素，上海光进公司隆重推出科技产品船舶用系列空盒气压表、温湿度表、潮汐时钟、倾斜表等等、优惠奉献给世界各国的广大航运用户，热情服务于航运事业，为满足全球海洋、内河航运安全运行新要求作贡献。

The Endurance Collection features five remarkable benefits never before available in a brass instrument collection. Imagine purchasing a brass instrument for your boat that will never need to be touched again except to change the battery! For the first time ever, a solution has been found to the complaint every boater makes when the harsh marine environment eats away at costly instruments; corrosion and tarnish. Change has diligently worked to resolve these problems using new technology to offer permanent solutions, while providing several other significant advancements as well:

- \* Endurance will never tarnish or corrode so it is maintenance free.
- \* Endurance is weatherproof and designed to be used outdoors.
- \* Endurance introduces the new Lock Mounting System with no visible mounting screws that allows for easy removal for adjustments, storage and security.
- \* Endurance instruments feature a lifetime warranty on finish and movements.

A clinometer meter is used to measure the heel of a vessel at sea. Knowing the heel, or angle of tilt of a vessel, is vital for optimum trim, as well as safety.

Low friction weighted movement

The clinometer meter provides superior performance in full sun and wide temperature extremes as there is no fluid or bubble. NOTE: Exposure to temperatures below freezing for long periods will not damage the unit. However, the indicator's movement will slow until temperatures increase.

规格:

测量范围: +/- 70 degree

测量精度: +/- 1 degree

尺寸: Dial: 4-7/8". Base: 6". Depth: 1-5/8"

外壳材质: 黄铜
